

Prime Chalkboard Film

Features

Prime Chalkboard Film is a 130 micron matt black polymeric vinyl, used as a chalkboard film for indoor applications such as POP displays, wall decorations and menu boards. This film carries a high tack adhesive which will stick to smooth walls, while still remaining removable for up to 1 year. Total Blackboard is printable with white UV curable inks, making it possible to create a custom design. Total Blackboard works with both standard, soft and liquid chalk markers, is easily wiped clean with a dry or damp cloth and will not leave any ghosting. However, please always check suitability of the chalkboard marker prior to installation. **Prime Chalkboard Film** is available in 1370mm & 1520mm (width) x 50m (length) rolls.

Technical & Performance

Information Film	-	130 micron
Thickness Adhesive	-	30 micron
Total Thickness	-	160 micron
Adhesive type	-	High tack removable clear solvent-based adhesive
Release Liner	-	140 gsm double-sided PE coated lay-flat liner
Artificial Weathering *	-	5 years
Adhesion to steel (20 mins / 180°)	-	6 N/25mm
Adhesion to steel (24 hrs / 180°)	-	7 N/25mm
Dimensional Stability	-	Excellent
Application Temperature	-	+5°C to +25°C
Service Temperature	-	-40 to +95°C
Printability	-	UV

* equivalent to vertical exposure in Mid-European climate
